Commissioning Ceremony Held for PMW 750, PMW 760

BY: Denise Wall

SAN DIEGO – A commissioning ceremony was held March 24 at SPAWAR Headquarters for two new program offices within the recently reorganized Program Executive Office for C4I and Space. Navy Capt. David Wegmann became the Carrier Integration Program Office (PMW 750) program manager, and Joseph Mayer became the Ship Integration Program Office (PMW 760) program manager.

“These teams have been particularly successful at identifying Fleet needs and ensuring that all command and control products and services were operating at peak efficiency to serve the warfighter,” said Dennis Bauman, Program Executive Officer for C4I and Space. “They are superb teams that have tangible and positive impacts on joint and Fleet operations, both today and for the foreseeable future.”

Front left to right, Joseph Mayer, Capt. Pete Baumann, who served as PWM 760 interim program manager, Dennis Bauman and Capt. David Wegmann at the March 24 Commissioning Ceremony.

PMW 750 and PMW 760, whose charter is to be the Program Acquisition Authority for all C4I carrier and ship integration efforts throughout the Navy, were established Aug. 5, 2004 as a result of an innovative and successful reorganization. It was designed to extend beyond “product-based services only” philosophy by focusing more on capability-based services for new platforms and for Fleet modernization. Under the current structure, six program offices focus on C4I product development and five program offices focus on C4I platform integration.

Wegmann, who first reported to SPAWAR in September 2003 as the assistant program manager for the Submarine Communications Program Office, was selected to be the PMW 750 program manager in October 2004.

Mayer first reported to the SPAWAR Office of the Chief Engineer in 1997 and then managed all shipbuilding support efforts after PEO C4I and Space was established in 2002. “We have the opportunity to build the long-term vision for Navy C4I by adding levels of detail to the PEO C4I and Space roadmap,” said Mayer, who was also selected to be PMW 760’s program manager in October 2004. “We get to make the links between our network centric warfare levels and FORCEnet.”
